READEX FICHE

I. BRIEF DESCRIPTION OF THE AUTOVON

A. The Global AUTOVON is the principal long-haul, nonsecure, common user voice communications network for the Department of Defense (DoD). It provides worldwide direct distance dialing station to station service through a system of government owned and leased automatic switching and transmission facilities.

B. At present, the AUTOVON spans the earth from Asia to the Middle East, and from Alaska to Panama. The AUTOVON has approximately 18,000 subscribers (direct access to the network). The number of users of the network (those who must dial an access code or go through an operator to obtain AUTOVON service) far exceed the number of subscribers. Calls on the network average about 1.1 million attempts daily with an average call length of 3 to 5 minutes.

C. AUTOVON is a major and integral part of the Defense Communications System (DCS). It is comprised of all DoD nontactical long-haul point-to-point communications facilities and personnel. It is the nonsecure common user switched voice network of the DCS.

D. The AUTOVON's primary mission is to provide rapid, world-wide command and control communications for the National Command Authority (NCA) and other high priority subscribers. Its secondary mission is to provide an acceptable grade of service for operational, intelligence, logistic, administrative, and diplomatic users.

II. NATIONAL COMMUNICATIONS SYSTEM VOICE PRECEDENCE SYSTEM

A. The National Communications System (NCS) voice precedence system, established by NCS Memorandum 1-70 dated 14 February 1970, is directed for use by all authorized users of the voice communications facilities in the DoD. Since the effectiveness of the system depends on the cooperation of the people authorized to employ it, users must (1) be familiar with the prupose of each precedence category and the type of call that is assigned the precedence, and (2) exercise care not to request or use a precedence higher than required.

B. The NCS voice precedence system does not make provisions for conducting test and exercise calls. Those activities or individuals authorized or required to conduct such test or exercise calls will employ a precedence consistent with the nature of the test or exercise. When the originator of the test or exercise call has contacted the called party, the call will immediately be identified as a "FLASH, IMMEDIATE, or PRIORITY test or exercise."

C. Calls of a given precedence will not normally preempt calls of an equal precedence. However, calls originated by the President of the United States, Secretary of Defense and Joint Chiefs of Staff can preempt FLASH calls in progress by application of their FLASH OVERRIDE capability. In addition, Commanders of unified and specified commands, when declaring either Defense Condition One (DEFCON ONE) or Air Defense Emergency, may preempt FLASH calls in progress by application of the FLASH OVERRIDE capability.

D. The examples listed below should aid the caller in determining what precedence to use. These examples are in accordance with the NCS voice precedence system, but are not to be used exclusively for determination of the precedence of a call. This should be at the discretion of the originator of the call.

1. FLASH OVERRIDE It should be noted that FLASH OVERRIDE is a capability and is not considered a level of precedence. Exercising this capability preempts calls in "ALL" levels of precedence. FLASH OVERRIDE calls will be handled as fast as humanly possible. The FLASH OVERRIDE capability is available to the following:

(a) The President of the United States of America

(b) The Secretary of Defense and Joint Chiefs of Staff.

(c) Commanders of unified and specified commands declaring either Defense Condition One (DEFCON ONE) or Defense Emergency.

(d) CINCNORAD when declaring either DEFCON ONE or Air Defense Emergency.

2. FLASH Flash calls preempt IMMEDIATE, PRIORITY, and ROUTINE calls and will be handled as fast as humanly possible. Listed below are examples of FLASH calls:

(a) Calls pertaining to command and control of military forces essential to defense and retaliation.

(b) Critical intelligence essential to National survival.

(c) Conduct of diplomatic negotiations critical to arresting or limiting hostilities.

(d) Dissemination of critical civil alert information essential to National survival.

(e) Continuity of Federal Government functions essential to National survival.

(f) Fulfillment of critical United States internal security functions essential to National survival

(g) Catastrophic events of National or International significance.

C. IMMEDIATE Immediate calls preempt PRIORITY and ROUTINE calls and are reserved for communications pertaining to situations which GRAVELY affect the security of National and Allied forces. These calls will be handled as fast as possible. Listed below are some examples of IMMEDIATE calls:

(a) Reconstitution of forces in a post attack period.

(b) Intelligence essential to National Security.

(c) Conduct of diplomatic negotiations to reduce or limit the threat of war.

(d) Implementation of Federal Government actions essential to National survival.

(e) Situations which gravely affect the internal security of the United States.

(f) Civil Defense actions concerning direction of our population and their survival.

(g) Disaster or events serious enough to have an immediate and detrimental effect on the welfare of the population.

(h) Vital information having an immediate effect on aircraft, spacecraft or missile operations.

(i) Distress assistance.

3. PRIORITY Priority calls preempt ROUTINE calls and are reserved for communications requiring expeditious action by called parties furnishing essential information for conducting government operations.

4. ROUTINE This precedence applies to official Government communications which require rapid transmission by telephonic means but do not require preferential handling. A ROUTINE call does not preempt any other call and is handled sequentially as placed by the calling party.

III. WHAT CATEGORY OF NETWORK CUSTOMER ARE YOU?

A. You are an AUTOVON SUBSCRIBER if you can make a call on your phone without going through a local operator or DO NOT dial a special access number. This type of telephone is installed for command & control and other specific operational purposes. More technically, any individual, post, station or location directly connected to an AUTOVON switching center is a subscriber. This means a post switchboard connected to the AUTOVON is also considered a subscriber. Most people who make AUTOVON telephone calls DO NOT fall in this category. The majority are AUTOVON users.

B. You are an AUTOVON USER if you dial a special access number before you can make an AUTOVON call or if an operator must place the AUTOVON call for you. This distinction between user and subscriber is made because there are differences in calling capabilities and instructions found later in this directory.

IV. WHO IS LISTED IN THE GLOBAL AUTOVON TELEPHONE DIRECTORY?

A. SUBSCRIBERS are usually the only listing in this directory. If you are a subscriber and desire to be listed or if you are listed and do not want to be listed, forward requests to DCA Code B522 Washington, D.C. 20305-2000.

B. USERS are not normally listed in the Global AUTOVON Telephone Directory. However, the following are exceptions:

1. If a user is served by a switch which has network in/out dial (NIOD) and is not manned 24 hours a day, calling parties must have a point of contact when the switch is unattended. Attended nonduty hour numbers may be listed in addition to the switch number.

2. If a user is an installation which has an individual information operator number in addition to the assistance operator number, that information number will be listed.

C. Requests for user listings should be directed in writing to the user's serving communications facility for consideration by the Telecommunications Certification Office (TCO). Amplifying information on AUTOVON directory listings can be found in DCA Circular 310-V55-6.

V. GLOBAL AUTOVON TELEPHONE DIRECTORY DISTRIBUTION

A. It is not practical to publish a Global AUTOVON Directory and provide a listing of all commands, activities and agencies that have the capability to access the network. It follows that distributing the directory to all commands, activities and agencies with the capability to access the system is costly. Yet, the directory needs the widest possible

distribution to be effective. This problem is recognized and distribution of the directory is made to all subscribers either directly or indirectly via major commands and agencies world wide. All users may purchase the directory from the Government Printing Office (GPO). If a directory is unavailable, an alternate method to obtain AUTOVON numbers is to consult your local operator.

B. Publishers of local directories are encouraged to include excerpts from this directory and locally tailored AUTOVON number lists in their directories.

C. If you are on the DCA distribution list for this directory and your address is incorrect, notify DCA, Code B522, Washington, DC, 20305-2000, using the correction page in this book.

VI. NETWORK RECORDINGS AND SIGNAL TONES

A. Various tones and recorded announcements tell you about the progress or disposition of your call:

1. When you hear a DIAL TONE, the network is ready for your call. Dial your number.

2. When you hear a RINGING TONE, your called number is ringing. Wait for your party to answer. On routine calls, you should hear a normal ringing tone (10 rings per minute). On calls of higher precedence, you will hear a very fast ringing tone (30 rings per minute).

3. When you hear a BUSY TONE, your called number is busy. Try again later. If you hear the busy tone and your called number is not in use then local or network equipment is busy. Sometimes there is an equipment irregularity. Try again later.

4. When you hear a PREEMPT TONE, your call was cut off by a higher precedence call. Hang up. Wait for a moment in case the call is for you. If the preempted call requires completion, custom dictates that whomever placed the original call should reestablish it.

5. When you hear a WARBLE TONE, answer your phone and standby for a conference call or instructions.

USE OF AUTOVON
CONSTITUTES CONSENT TO
COMMUNICATIONS SECURITY MONITORING

B. Below are some of the recorded announcements you might hear while using the AUTOVON. These announcements should be noted and reported according to procedures outlined in para XV Telephone Trouble Reporting, if trouble is suspected.

1. "Your call cannot be completed as dialed. Please consult your directory and call again or ask your operator for assistance. This is a recording (pause) SSB number ___."

2. "The precedence used is not authorized for your line. Please use an authorized precedence or ask your operator for assistance. This is a recording (pause) SSB number ___."

3. "Equal or higher precedence calls have prevented completion of your call or the number you have dialed is not equipped for preemption. This is a recording (pause) SSB number ___."

4. "AUTOVON service disruption has prevented the completion of your call. Please wait 30 minutes and try again. In case of an emergency, call your operator. This is a recording (pause) SSB number ___."

VII. CONFERENCE CALLS

A. Dial one of the following numbers and tell the operator you wish to make a conference call:

	CONUS	Alaska	OVERSEAS
1. Subscribers dial	0	0	550-1411
2. Users dial	0	0	0

VIII. CALLS TO COMMERCIAL NUMBERS

Official long-distance calls should be placed using a combination of AUTOVON and local base switchboard lines where possible. You can use this procedure if the called base switchboard is permitted by the commander to connect incoming AUTOVON calls to a commercial number and the called commercial number is within the toll free radius of the switchboard. OFF-NET extensions will not be completed unless adequate call supervision is installed.

IX. CALL ASSISTANCE

AUTOVON Assistance Operators (AAO) are available to assist subscribers when needed. If you are having trouble completing a call, dial "0" to reach the AAO.

X. SUBSCRIBER PROVIDED EQUIPMENT

The terminal equipment provided by the subscriber for connection to an AUTOVON switching center must meet the technical interface criteria outlined in DCA Circular 310-V175-6, System Interface Criteria.

XI. NEW OR ADDITIONAL SERVICE

In order to obtain new AUTOVON service or to change the type of service you now have, consult DCA Circular 310-130-1, Submission of Telecommunications Service Requests.

XII. GLOBAL AUTOVON CALLING

A. The AUTOVON telephone network provides global telephone service for the DCS. Some subscribers can call everywhere while others are limited to one particular area or combination of areas. Where you can call depends on your mission and whether your telephone line is equipped accordingly. If your calling area is limited, you will not be able to dial outside of your limit. The directory indicates the calling areas and codes. The area code need not be dialed for calls within the area. Calls to an area outside the boundary require an area code plus the seven digit AUTOVON number. If you are transmitting data, alternate area codes are used. Voice and Data area codes are listed on the first page of each geographical listing. (NOTE: All CONUS and Alaska subscribers can make respective inter-area calls by following the above procedures.)

B. Secure calls via an AUTOSEVOCOM telephone will be made in accordance with instructions in the AUTOSEVOCOM Telephone Directory.

XIII. CALLING PROCEDURES

A. VOICE TELEPHONE CALLS: Listen for the dial tone, depress the appropriate precedence button if the call is to be higher than routine, and dial the AUTOVON number as outlined above under global AUTOVON calling.

B. DATA TELEPHONE CALLS: Data telephones and associated data equipment are operated in accordance with local restrictions. If you send data via AUTOVON, it is necessary to observe the following restrictions:

1. DO NOT:

(a) transmit more than 18 continuous minutes.
(b) transmit more than one hour during the busy calling time.
(c) use a precedence higher than ROUTINE.

2. DO:

(a) use nonbusy hours for data transmission when possible

(b) dial "11" to properly condition telephone lines for data calls

(c) ensure that the device is equipped with an automatic disconnect to free the telephone circuit after the device becomes inactive for one minute.

XV. TELEPHONE TROUBLE REPORTING

A. Ensure that the AUTOVON number you used is correct. If you dialed the number correctly and you are still having trouble, report the problem as follows:

1. Keep the line connected if you can. Call the AUTOVON trouble desk at 550-1611 on a different line. (550-1611 will ring at your serving AUTOVON switch.) Tell the trouble desk attendant:

(a) Your AUTOVON number and location

(b) Called party AUTOVON number and location

(c) What the problem was and when it occurred

(d) Get the attendant's initials then request a call back when the trouble is repaired.

(e) If you hear an announcement, listen until the end; you will hear a number (SSB Nr ___). Provide this to the trouble desk. This will help trace the source of the trouble.

2. If you can not reach the AUTOVON trouble desk, call your local repair service or the operator using a local base telephone. Be sure to state that you are reporting an AUTOVON trouble.

REPAIR ITEMS SUCH AS BROKEN PARTS OR FRAYED CORDS ARE NOT AUTOVON PROBLEMS AND SHOULD BE REFERRED TO THE LOCAL REPAIR SERVICE.

XVI. UNSATISFACTORY SERVICE REPORTING

A. If you are not satisfied with the results when you reported an AUTOVON trouble, please inform DCSO Code B522 in writing. Keep in mind that we have to give this report to engineers and technicians for resolution, so we have to ask for some fairly technical details. If you need help in making the report, contact your local telecommunications officer or OIC of the station switchboard. The following information is necessary:

1. Your station name, unit name, AUTOVON telephone number and whether the trouble concerns a telephone or a switchboard.

2. The time and date you first noticed the problem, the AUTOVON trouble desk you reported it to and whether the problem was solved.

3. What kind of problem you had and the impact it had on your mission.

B. If you are unhappy with the agency which was supposed to fix the problem, tell us exactly what unit it is, when you called them, when they arrived and when/if the problem was repaired. Let us know why you think their service was unsatisfactory. If this is a repeated problem, inform us how many times and whether your comments apply to each occurence.

C. Give us any background on the problem you have including what the maintenance technicians say the trouble was. Suggest any changes you would like to see. Pinpoint any trends of performance which may result in unsatisfactory service.

1. Send the report to the agency nearest you:

(a) Action:

(1) DCA HQ, DCSO
Code B522
Washington, D.C. 20305-2000

(2) DCA EUR
Code E520
APO New York, NY 09131

(3) DCA PAC
Code P420
Wheeler AFB, Hi 96854

(b) Info:

O&M Agency in your area responsible for providing service

XVII. GLOBAL AUTOVON CALLING

USERS are normally limited to placing ROUTINE calls within a geographic area whether they do the dialing or go through an operator. To call outside a calling area, dial "0" and ask the switchboard operator for assistance.

XVIII. USER CALLING PROCEDURES

A. You can get an AUTOVON line in several ways. Either dial an access code (usually "8") or dial the operator. Here is how each works:

1. If you do the dialing:

(a) Listen for the dial tone
(b) Dial the AUTOVON access number
(c) Listen for the AUTOVON dial tone (optional at some locations)
(d) Dial the AUTOVON number

2. If the operator dials for you:

(a) Give your name & local base telephone extension number
(b) Give your precedence
(c) Provide the AUTOVON number you are calling and any other information the operator needs
(d) Wait on the line until the operator connects you to the called party.

XIX. HOW TO USE THE DIRECTORY

A. The new format for the telephone which became effective in September 1983, shows the operator assistance numbers in a separate column next to the telephone number for the individual commands and also provides listings by "activity" on the more common and redundant subscriber titles, e.g. AFB Lowry. This ensures that changes submitted by an individual for an activity will be entered into the database for all the listings for that activity and also allows us to update older listings in the directory in the event that an individual submits a change by a new activity title. As an example: the NNX for the Norfolk, VA area changed from 690 to 564. This was an extensive change, affecting approximately 35 individual listings. 15 of these 35 listings were removed as a result of the new format. The standardization of subscriber designation/titles aids the individual in locating the command they wish to call thus removing, in time, some of the burden from the operators who have to look up numbers for individuals because they are unfamiliar with the exact title of a command.

B. Instead of looking up "Lowry AFB", the directory user will look up the activity type, i.e. "AFB" Lowry. This also aids the directory user in locating a command in a locality even if the "proper" name is not known. For example a user might know that there is an AFB in Colorado that he or she needs to call but is unsure of the name or how it is listed. By looking up "AFB" and then thumbing down alphabetically either in the geographical section or the Air Force

section the user will find the listing even though "weeding" out two or three AFB's in a state might be necessary. This situation frequently occurs when a directory user is in another service or DoD agency and is unfamiliar with other agency's listings. The deletion of redundant duplicate entries improves directory accuracy and simplifies updating procedures. As a result of removing multiple listings, the directory data base contains entries in a single file as compared to the old format which contained approximately 10,000 entries encompassing 10 files. This significant decrease in volume assures greater accuracy and will provide improved subscriber convenience once they become familiar with the format. In the case of PBX operators attempting to look up the entries for an AUTOVON user, it should be noted that a user is responsible for at least having an idea who they need to contact. Or failing that, the user should exercise patience with the operator attempting to aid him or her in determining whom they wish to talk to. This has been a primary complaint of PBX operators since this new format has been incorporated. The new format no longer allows the operators the redundant flexibility that the old one did. In the future it will not be enough for a user to know that he or she wants "some command in Wichita Kansas" and expect the operator to take it from there. It is now necessary for a user to know what agency the command belongs (ex., DoD, Army, Navy, Air Force, etc.) or at least a reasonable facsimile of the command title. Below are some examples on how to use the directory.

1. If one needs to find Lowry AFB command post:

(a) Look up AFB in either the geographical section or the Air Force section.

(b) Thumb down the listings for AFB alphabetically until you come to Lowry.

(c) If none of the listings show "command post", go to the glossary of abbreviations section in the back of the Global AUTOVON Telephone Directory and look up command post (CP) alphabetically.

(d) Thumb down the AFB Lowry listings alphabetically until you come upon "CP".

2. If one needs to find the military traffic management command in Bremerhaven Germany:

(a) Look up military traffic management command in either the geographical section or the department of defense section.

(b) Thumb down the listings alphabetically until you come to military traffic management command Bremerhaven GE.

(c) If there is no listing for military traffic management command go to the glossary of abbreviations in the back of the AUTOVON Telephone

Directory and look up the abbreviation for military traffic management command (MTMC).

(d) Look up MTMC in either the geographical section or the department of defense section of the directory.

(e) Once you have found the listing thumb down alphabetically until you come to Bremerhaven.
